"I'm not going to buy my kids an encyclopedia. Let them walk to school like I did"

delivery by the 'transfer' of the care of children and their parents. She received her BS, MD, and many post-graduate medical training here. She was probably among the last to do a Mixed Internship (that word we don't use much anymore in medicine - think [i.e. intern] what it meant in terms of work hours. and had a general community practice before she came to the MCH for a residency in pediatrics and subspecialty training in nephrology. She came on to the MCH as an attending staff and founded the hospital-

patient. Much of Lorraine's work has involved knowledge translation efforts for which she has beaten a steady drum with a resulting emerging awareness and sensitivity with better results on the ground.

We can all take pride in Lorraine's efforts. Even better, we can resolve ourselves to transition our patients rather than merely transfer them.

Have a great weekend everyone!

Michael
