| Rationale                      |   |                                    | This course is now offered in the Winter. The proposed change is to reflect the correct semester under "Supplementary Calendar Information". The course description and supplementary information were also updated to reflect the current course content. Also, PHYS 202 has not been offered for many years and therefore the restriction is no longer needed. |  |  |  |
| Responsible<br>Instructor      |   |                                    |  |  |  |  |
| Course Description             | The day-to-day physics behind and phenomena around us. It is intriguing properties of machine simple physical theories expl | Demonstrations of aterials and the | The day-to-day physics behind the materials and phenomena around us. Demonstrations of intriguing physical phenomena in our everyday life.   |  |  |  |
